COPY

Dear Sirs,

Dutch Patent Application No. 8102299
Philip Morris Inc. - Our file: 23844

Thank you for your letter of 28th March.

In view of the fact that prosecution in other countries has not necessitated significant changes in the claims of this case we would prefer to await the Dutch Examiner's views before submitting amendments and argument. It seems very likely that at least the form of the claims will require amendment and a reduction in the number of claims will be called for but we would like to see which documents the Examiner relies upon before undertaking a full revision.

Yours faithfully,

P.A.SMITH
